DETAILED ACTION

Remarks

1. This office action is in response to the amendment filed on 7/02/2009.

Claims 17-19 have been cancelled.

3. Claims 1, 5-7, 10-12 and 14-16 have been amended.

4. Claims 1, 10 and 16 are now being further amended by the Examiner.

 Claims 1, 5-8, 10-12 and 14-16 remain pending and now being allowed (renumbered as claims 1-11)

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

 Authorization for this examiner's amendment was given in a telephone interview with Timothy D. MacIntyre (Reg# 42,824) on 11/04/2009 to obviate any potential 35 U.S.C. § 112 issues, and to put the claims in condition for allowance.

The application has been amended as follows:

IN THE CLAIMS

Please amend claims 1, 10 and 16 as follows:

Application/Control Number: 10/696,393

Art Unit: 2192

Claim 1 (Currently amended);

A method for controlling a value of a RAM (random access memory)

variable parameter inside an executable program, comprising:

presenting a software program in executable form and having a plurality of machine instructions of a finite quantity of fixed lengths;

selecting [a] the parameter of interest that is defined in random access memory associated with the software program;

evaluating each machine instruction in the executable form of the software program to identify <u>one or more load or store</u> machine instructions that contain address information for the parameter;

replacing the identified machine instructions in the executable form of the software program with a branch instruction that references an address outside an address space of the software program;

defining a set of relocated instructions at the address referenced by the branch instruction, wherein the set of relocated instructions function to change [a] the value of the variable parameter; and

executing the executable form of the software program having the branch instruction.

Claim 10 (Currently amended);

A computer-implemented calibration system for modifying RAM (<u>random</u> access <u>memory</u>) variables <u>parameters</u> of a software program in an executable Art Unit: 2192

form and having a plurality of machine instruction of a finite quantity of fixed length embedded in a microprocessor, comprising:

an instruction locator embodied as computer executable instructions on a computer readable medium and operating on a different processor than the microprocessor, the instruction locator that selects a parameter of interest in the software program that is defined in random access memory associated with the software program and evaluates each machine instruction in the executable form of the software program to identify <u>one or more load or store</u> machine instructions that contain address information for the parameter; and

an instruction replacement component embodied as computer executable instructions on a computer readable medium and operating on the different processor than the microprocessor and in data communication with the instruction locator, the instruction replacement component adapted to receive a branch instruction for the at least one machine instruction and operable to replace the identified machine instructions in the executable form of the software program with the branch instruction.

Claim 16 (Currently amended);

A method for controlling a value of a RAM (<u>random access memory</u>) variable parameter inside an executable program, comprising:

presenting a software program in executable form and having a plurality of machine instructions of a finite quantity of fixed lengths;

Application/Control Number: 10/696,393 Page 5

Art Unit: 2192

selecting [a] the parameter of interest that is defined in random access memory associated with the software program;

evaluating each machine instruction in the executable form of the software program to identify machine instructions that contain address information for the parameter;

replacing the identified machine instructions in the executable form of the software program with a branch instruction when the identified machine instruction is a load instruction or a store instruction, where each branch instruction references an address outside an address space of the software program;

evaluating each of the identified machine instructions by searching for additional machine instructions that contain address information for the parameter and are referenced by the identified machine instructions when the identified machine instruction is not a load instruction or a store instruction;

defining a set of relocated instructions at each address referenced by the branch instructions, wherein each set of relocated instructions accesses the variable parameter in random access memory and performs an operation to change a value of the variable parameter in a different manner; and

executing the executable form of the software program having the branch instruction.

Allowable Subject Matter

9. Claims 1, 5-8, 10-12 and 14-16 are allowed. As the Applicants pointed out under REMAKRS section, page number 8-9, the cited art (Karp and Voas) considered both separately and in combination fails to teach or suggest the limitations about evaluating each machine instruction in the executable form of the software program to identify machine instructions that contain address information for the parameter and defining a set of relocated instructions at the address referenced by the branch instruction, wherein the set of relocated instructions function to change the value of the variable or parameter; and in as such manners as recited in the independent claims 1, 10 and 16, thus each of the dependent claims are allowable for at least the same reasons.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
